

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A method of downmodulating the immune response to an intestinal allograft in a subject consisting essentially of administering to the subject a combination of an antibody that binds to B7-1, an antibody that binds to B7-2, and a rapamycin compound, such that the immune response to an intestinal allograft in a subject is downmodulated.
2. (Canceled)
3. (Currently Amended) A method of downmodulating the immune response to an intestinal allograft in a subject consisting essentially of pretreating said subject prior to said intestinal allograft with a combination of an antibody that binds B7-1, an antibody that binds B7-2 and a rapamycin compound, such that the immune response to an intestinal allograft in a subject is downmodulated.
4. (Currently Amended) A method of downmodulating the immune response to an intestinal allograft in a subject consisting essentially of post-treating said subject after said intestinal allograft with a combination of an antibody that binds B7-1, an antibody that binds B7-2, and a rapamycin compound, such that the immune response to an intestinal allograft in a subject is downmodulated.
5. (Currently Amended) A method of downmodulating the immune response to an intestinal allograft in a subject consisting essentially of pretreating said subject prior to said intestinal allograft and post-treating said subject after said intestinal allograft with a combination

of an antibody that binds B7-1, an antibody that binds B7-2, and a rapamycin compound, such that the immune response to an intestinal allograft in a subject is downmodulated.
